### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Paul Mitchell on 02/03/2005.

The application has been amended as follows:

#### **IN THE CLAIMS**

#### **CANCEL CLAIM 2.**

#### **Amend the claims as follows:**

1. (Amended) A document tracking method, comprising:
  - sending a document from a multifunction device to a network destination;
  - sending a tracking component for said document from said multifunction device to a receipt service;
  - sending a confirmation of receipt to said receipt service when said document is at said network destination; and
  - generating a return receipt based at least in part on said tracking component and said confirmation of receipt at said receipt service when said document is at said network destination to acknowledge receipt of said document by said network

destination and wherein the method is configured to deliver said document from said multifunction device to said network destination without relying on an operational status of said receipt service.

2. (Cancelled)

3. (Amended) The method of claim 1, further comprising manually activating delivery of said confirmation of receipt of said document at said network destination.

15. (Second Amended) A document tracking method, comprising:

sending an electronic document from a multifunction device to a network destination;

sending an electronic tracking component for said document from said multifunction device to a receipt service;

sending a confirmation of receipt to said receipt service when said electronic document is at said network destination; and

generating a return receipt at said receipt service based at least in part on said tracking component and said confirmation of receipt to acknowledge receipt of said electronic document by said network destination and wherein the method is configured to deliver said electronic document from said multifunction device to said network destination without relying on an operational status of said receipt service.

Art Unit: 2157

23. (Second Amended) A system for tracking a document, comprising:
- a multifunction device for sending said document to a network destination;
  - a tracking component generated for said document and sent from said multifunction device;
  - a confirmation of receipt sent from said network destination when said document is at said network destination; and
  - a receipt service for receiving said tracking component and said confirmation of receipt and for generating a return receipt based at least in part on said tracking component and said confirmation of receipt to acknowledge receipt of said document by said network destination and wherein the method is configured to deliver said document from said multifunction device to said network destination without relying on an operational status of said receipt service.

The following is an examiner's statement of reasons for allowance: None of the prior art of record taken singularly or in combination teaches or suggests generating a return receipt at receipt service, based at least in part on tracking component received from a multifunction device and confirmation of receipt when document sent by the multifunction device is at network destination to acknowledge receipt of the document by the network destination and wherein the document is delivered from the multifunction device to the network destination without relying on an operational status of the receipt service..
